

# Gas Turbo Technology

Specialised Information and Analytical Edition

If you are looking for a business partner or equipment supplier, if you are an engineer or a professor, if you teach about gas turbines or study them then we publish it for you.

## Gas Turbo Technology magazine

- GTT magazine is a Russian specialised information and analytical edition. It has been published for 8 years in Russian covering gas turbine designs and applications, reports on installation, operation and maintenance of gas turbines and GT powerplant, new products and business development.

Since last year **Gas Turbo Technology** magazine is published completely in English providing the information about Russia and CIS gas turbine market at first hand. With the help of **Gas Turbo Technology** magazine you will discover new opportunities for your business and get acquainted with companies, technologies and key persons of the industry.

The magazine covers the following themes:

- Gazprom's projects
- Russian companies' new developments and trends
- Russian and CIS market peculiarities
- Requirements to supplied equipment
- Reforming of the Russian power industry

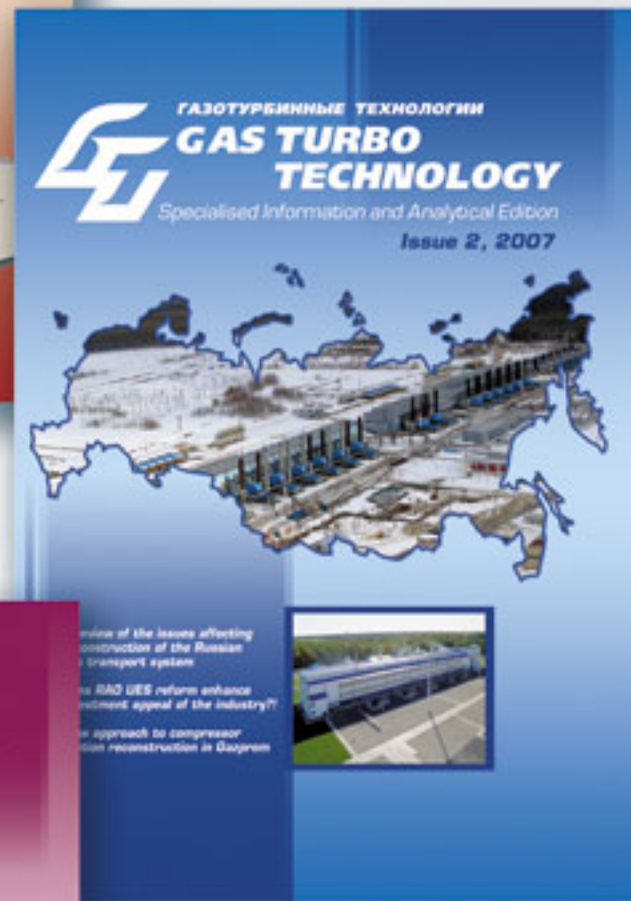

We offer you to subscribe to **Gas Turbo Technology** magazine (four issues a year, annual price is € 60). Airmail worldwide delivery is included. The subscription can be paid by a credit card at our web-site or via a bank transfer.
